

The Grundfos CMV pumps are non self-priming multistage centrifugal pumps suitable for a wide range of applications including water transfer, irrigation, boosting and industrial use.

The pump consists of a base and a pump head. The chambers are secured between the base and the pump head by means of staybolts. All pumps are fitted with a maintenance free mechanical shaft seal and incorporate stainless steel impellers, interchambers and shaft. The pump is fitted with a totally enclosed fan cooled 2-pole Grundfos standard motor with principal dimensions to EN standards.

### Features

**Pumped Liquids :** Clean, thin, non-aggressive liquids without solid particles and fibre.

**Liquid Temperature :**  
20°C to +90°C

**Maximum Operating Pressure :**  
10bar
